END POST NORMAL

Accurate quality/price
in an end post

Standard lengths (mm): 2500 / 2200 / 2000 and 1800. The desired length can be produced on demand.

GENERAL SPECIFICATIONS

The notches along the post allow to adapt the joiners and chains with the greatest convenience and speed.

The posts are marked with the year when they are manufactured.

The posts are totally prepared for integrated mechanization (harvest, cutting, etc.)

Depending of the type of terrain and instalation, it's advisable to nail 1/3 of the total length.

Recomended not to design lines bigger than 100 metres.

DESCRIPTION

Open shaped 57x45 mm end post with a good mechanical resistance and ground fixing characteristics. It is recommended for medium size production vineyards.

QUALITY

TYPE OF STEEL AND COVERING: DX51D Steel, Z-275 Galvanized, according to the EN-10346:2015.

Possible to manufactured on demand different covering (Magnelis...) or with other special types of steel as "Corten" or raw steel.

THICKNESS: 2,00 mm.
